THE BASSANO MAIL, THURSDAY, APRIL 26, 1935.

VOLUME 54, No. 19.

## SOCIAL CREDIT

(Special to The Mail)

**Husar**  
In spite of the adverse condition of the roads, a large crowd gathered for Social Credit study on Tuesday evening, April 16. P. J. Mueller, delegate to the recent convention in Calgary, rode in twelve miles on horseback to give his report. He discussed the new platform, plank by plank; and as he was vice-chairman of the resolutions committee, he was able to give first hand information in regard to the resolutions taken up at the convention.

Mr. Mueller, who is very well informed on the Social Credit plan, will make a tour of this constituency later, speaking before audiences in Rosemary had several other places during the next two weeks.

The members took a particular interest in this broadcast, as their group, for the second time, was helping to support it.

During speaking operations, it was decided to meet every two weeks.

## Countess

On Wednesday night, April 17th, Mr. Mueller of Husar gave a very interesting and educational address on Social Credit. Mr. Weygert's report on the Calgary convention was good. After the meeting, a lunch was served, followed by several vocal selection and a recitation, which were enjoyed by all.

## Makespace

Mr. L. P. Schoelling of Husar addressed a meeting in the School house here on April 26th on the topic of Social Credit. Mr. Schoelling also gave a very interesting report on the Calgary convention. We extend our hearty thanks to this speaker.

## THE "CAPITALISTIC" PRESS

We often wonder what political critics mean when talking of the capitalistic press. So far, no political party has ever made up capitalistic with their cash support. We have tried to give all shades of opinion a fair news report and criticized only when they didn't go far enough, or went too far. But we never have gotten paid for opinions we expressed, nor have we waded rich from the advertising revenues. So the weak speaker that takes a whack at us or our contemporaries, in the weekly field at least, we will go out of our way to tell you readers just exactly what we think of them and their ideas.—Clareholm Local Press

## Pupils of Miss M. Bell Have Recital

The pupils of Miss Margaret Bell, L.R.C.M., did splendidly in the piano recital on Wednesday evening. They were commended by the large and appreciative audience of music lovers.

The program consisted of the solo: "Sparkling Eyes" by Lorna MacLean; "Pearly Bell Ringers" by Freda Sheels; "Dance of the Butterflies" by Margaret Thurman; "Dance of the Fireflies" by Milla MacLean; "Pisces' Waltz Song" by Norma Engle; "Slipshod's Song" by Lilla MacLean; "Polly" by Babe Bassarab; "Doll Dance" by Pamela French; "War of the Roses" by Elaine Sambrake; "Meditation" by Verne Thompson and the duets: "Thunder March" by Caroline Deebor and Elaine Sambrake; "The Dance of the Rosebuds" by Freda Sheels and Norma Engle; "March of the Life Guards" by Babe Bassarab and Verne Thompson; "Boy Scout Parade" by Elaine Sambrake and Lilla MacLean.

The "Rhythmic Kiddies" eighteen strong, accompanied the opening song, "Oh Canada" and also rendered several selections, "Wedding of the Painted Doves" by "The Town Express", "Tuck Tock Tock" in such pleasing manner that the audience demanded encores. The children in the band were very attractive in their bell hop costumes of white pants and green coats and pill box hats.

These recitals serve the purpose of giving the public confidence and appreciation of the value of a musical education.

This was the second annual recital and the pupils showed considerable improvement.

Miss Bell contributed a masterly interpretation of Donohani's Rhapsody in F minor. At the close of the recital Miss Bell was presented with beautiful bouquets by Norma Engle from her pupils, Pamela French and Robert Edwards on behalf of the band.

God Save the King was accompanied by the "Rhythmic Kiddies". The proceeds of the evening were donated to the Knox Presbyterian Church fund.

Miss Florence Molise of Cassila, Miss Donna Gamble of Couture and Miss Anna Margaret Moffat of Husar, were unable to be present at the recital on account of the adverse conditions of the roads.

Tom Ingber and Louis Simoni have been grading the town streets since the latest snows.

## CHANCELLOR

CHANCELLOR, April 26th.—Mr. Harry Chamney entertained at dinner on Wednesday night, and had as guests, Mr. and Mrs. Thompson of Calgary, Mr. J. Thompson, Mr. and Mrs. G. C. Phillips, Mrs. Phillips and Mr. and Mrs. H. F. Phillips and family.

Miss Marjorie Grant left on Thursday for Calgary to spend the Easter holidays with her parents. Farmers expect to commence operations on their land this week, and some will be seeding in this district by Wednesday or Thursday.

Perry Barker, keeps his new Ford V-8 gaily humming since the roads have dried up. We notice that he takes the road going east to Bassano.

Amongst those who motored to Calgary during the week are: Mr. and Mrs. Harry Muir, Mr. and Mrs. H. F. Pinks and family, Mr. and Mrs. E. Christensen, Mrs. Ina Smith and Johnny, G. C. Phillips, Mrs. and Mrs. Fraser and Billy.

Boy Basketball of Bassano, was in Chancellors Friday.

## Women's Institute Hold Successful Dance Mon.

The Bassano Women's Institute sponsored a very successful What Drive and Dance on Monday evening in the Masonic Hall. Owing to the rain the crowd was not as large as expected, but those who attended were well repaid as a very enjoyable program was furnished.

The prizes for the What were won by H. Pragnal, Gentlemen's first, A. Ingber, Gentlemen's consolation, Mrs. Ingber, Ladies' first and Miss J. Ingber, Ladies' consolation. Miss Grace Dunlop held the lucky ticket that won the Cushion—number 53.

The Institute wish to thank the High School Orchestra for coming to their aid in providing music until the Scarlet Serenades arrived. They also wish to thank Mr. A. McKee for his kind donation of prizes for "What" also all others who so kindly donated various articles.

## C. P. R. OFFERS SPECIAL FARES FOR KING'S JUBILEE

As May 6th has been declared a National Holiday in recognition of the King's Silver Jubilee, special rates on Canadian Pacific will apply over the week-end for travel between stations, it was announced by H. H. Beeber, Ticket Agent.

## APRIL SITTING OF COURT HELD HERE

22 Applications for Naturalization heard—Urbertin wins suit.

Judge W. A. Macdonald of Calgary presided over the court at the April sitting of the Bassano sub-judicial district last Thursday.

Twenty-two applications for Canadian citizenship were granted by the judge. The majority of the applicants were of European descent, but there was a fair proportion of Americans also. They represented the districts of Gen. Husar, Brooks, Cluny, Rosemary and Barrhead.

Urbertin Wins Suit  
In the action of P. Urbertin of Bassano, versus A. Laganier, Rosemary, defendant, Judge Macdonald rendered judgment. However, in a written judgment handed down later in the week, he awarded plaintiff damages of \$209.50 and costs and allowed a counterclaim for damages with costs.

The action followed an accident on the highway a few miles east of Bassano on Saturday, April 21, 1934. P. Urbertin alleged that A. Laganier was driving on the wrong side of the road when the two autos collided. The defendant claimed that he was on the right side and that the plaintiff was on the wrong side and failed to dim his lights. Both cars were extensively damaged. From evidence, His Honor said, it appeared that the plaintiff was in the right.

Wm. McLaws acted for the plaintiff and W. K. Webb for defendant.

Appeal Granted  
Judge Macdonald granted an appeal of J. W. McIntosh of Majorville over a decision by Police Magistrate S. H. Edwards in a wage dispute and claim for \$82.30. The plaintiff was Ivar Lindgren of Majorville.

The plaintiff alleged that defendant had hired him and was liable for wages.

The judge decreed that from all evidence, it was proved that W. B. Gungish, tenant on McIntosh farm, was liable for wages.

## The Parliamentary Show

By J. S. Cowper  
The last days of the U.P.A. reign in the Alberta legislature are like a Donnybrook Fair, with one of the ministers assuming a witness on behalf of the press, and Edmonton mayor being removed from the gallery of the House and prohibited from further entry for calling Mr. O. L. McPherson a liar during the ex-minister's speech.

Much to the surprise of gallery wisecracks, the Legislature did not prorogue last Thursday night as expected. Far too many issues of vital effect in the common general election cropped up. Despite the anxiety of farmer members and others to get back to their homes and businesses, the House adjourned to Saturday and will probably sit all of Easter week.

With tempers frayed and nerves on edge the members have still to dispose of three important matters. First is the brace of bills designed to muzzle the press of Alberta. The penalties are ruinous. Fine or imprisonment of \$5,000.00 if the paper is owned by a company, and of \$1,000.00 on the individual owner, publisher and editor, if any mention is made of evidence in a divorce or matrimonial suit, or any proceeding to (Continued on inside page)

## Tennis Club Holds Meet To Organize

The Tennis Club held its annual meeting in Wm. McLaws' office last Thursday evening. With the coming of real spring weather, the courts will soon be put into condition for play.

No district association will be formed this year. Tournaments may be arranged between Brooks, Bassano and Glenora if the other clubs are willing.

Since last year's operations led to a deficit of about \$10, it was decided to have all repair work done by members this season. Fees will remain the same as last year.

Officers  
The following slate of officers was elected: President, C. Nesbitt; Vice-president, A. Hansen; Secretary-treasurer, L. N. Willoughby.

Executive: Gordon Smith, George Scher, George Stiles. Entertainment: Florence Playfair, Mrs. L. B. Newby, Archie Johnston.

## DUCHESSE

DUCHESSE, April 24th.—Mr. and Mrs. M. Purcell and Jean motored to Calgary for Easter; Miss Helen Swenson accompanied them for the holiday.

Mr. Alf Indergard and family spent Easter in Crossfield. Miss Lucille Robinson accompanied them.

Miss Olga Holm, who teaches in Coleman, is visiting home folks.

Mr. and Mrs. Burke and family visited relatives in Queenstown at Easter-time.

Mr. and Mrs. J. Horn and Donald spent Easter in Calgary. Mrs. Horn's sister, Miss Brunshett, who teaches in Edmonton, returned for a few days.

Mr. G. Gahan and Mr. Harry Gahan and family left for Oregon on Wednesday.

Stanley Anderson is visiting in Calgary.

Mrs. M. Root entertained twenty ladies on Tuesday in honor of Mrs. Sisson of Innisfail. The time was spent socially, dainty refreshments being served.

## NOTICE

Notice is hereby given that pursuant to THE IRRIGATION DISTRICTS ACT, I have been duly appointed as returning officer for the purpose of taking a vote for the election of a board of trustees for the Eastern Irrigation District and the Eastern Irrigation District hereby nominate \_\_\_\_\_ as a person eligible to hold office as trustee under the provisions of THE IRRIGATION DISTRICTS ACT.

The resignation of A. L. Smith, trustee accepted as he is moving away, elections for the office of Secretary-Treasurer were held, resulting in the election of Jas. Nesbitt.

The Board expressed by vote its thanks and appreciation for services of Mr. Smith, who has taken an active and conscientious part in the Board's activities.

Dated this 25th day of April, 1935.

Robert B. Williamson  
Returning Officer.

Postal Address: Brooks, Alberta.

Form of Nomination Paper for Board of Trustees

We, the undersigned water users within the meaning of THE IRRIGATION DISTRICTS ACT, in the Eastern Irrigation District hereby nominate \_\_\_\_\_ as a person eligible to hold office as trustee under the provisions of THE IRRIGATION DISTRICTS ACT.

The resignation of A. L. Smith, trustee accepted as he is moving away, elections for the office of Secretary-Treasurer were held, resulting in the election of Jas. Nesbitt.

The Board expressed by vote its thanks and appreciation for services of Mr. Smith, who has taken an active and conscientious part in the Board's activities.

Dated this 25th day of April, 1935.

## Board of Trade Will Build New Dance Floor

To Erect Dance Floor in Curling Building—Arrange for Small Celebration on May 1st.

Forming a few over a dozen by the Board of Trade, the Board of Trade settled into the harness at the Wednesday meeting and quickly dealt with the business on hand.

James Johnston again enumerated the advantages of putting the movable dance floor in the Curling Building, stating it would provide a means of keeping the crowd together when the July 1st Carnival and Dance were under the same roof, would provide at least 50 percent more dancing space, would make the building work in summer as well as in winter, and would alleviate the necessity of taking down carnival booths due to rain etc.

The floor will be used only in the summer for events and entertainments sponsored by the Board, and the building will not compete with the Curling Club's hall in the remainder of the year.

A motion to borrow \$400 or less from the Fairgrounds Trustees for the purpose of building the floor was passed. The trustees agreed to build the floor, but it is understood the remainder of the required amount will be borrowed from other sources.

The estimated cost of the construction is \$411.00.

Jas. Johnston, originator of the idea, H. H. Beeber and H. W. Harper formed the committee to make final arrangements with the Bassano Curling and Skating Rinks Ltd. to proceed with the project at once.

Walter K. Webb and H. H. Beeber were appointed to interview the Town Council, the School Board, the Women's Institute and the Fire Brigade for the possible arrangement of a dining celebration of some means for the King's Jubilee on May 6th.

Mr. Beeber, speaking for the Fire department, said he felt that organizations would give him full support.

Secretary-Treasurer A. L. Smith reported that cash on hand in the various accounts totaled \$351.57.

The Membership Committee reported a membership of 25 with the possibility of 50 by the end of the month.

The sum of \$200.00 was set aside for the use of the Parks committee, which reported that the auto camp was desired of refuse and nearly ready for use.

A letter from the Sea Cadets Band in Calgary was read in which the writer said that the band would require a band on May 6 or other celebrations, he would supply all information pertaining to engagements.

Walter Webb gave the financial report of the Music and Dramatic Festival held here on April 12. Receipts totaled \$49.95, with expenses of \$59.55, not including \$5.00 still owing. He gave notice of motion for the next meeting that \$150.00 be paid by the Board to the Bassano Music and Dramatic Association as a grant.

Mr. Beeber said that in regard to an orchestra for July 1st, he had received an offer from the Scarlet Serenades to play from 3 p.m. to 4 or 5 a.m. for the sum of \$40.00. Mr. Beeber's actions in temporarily engaging the orchestra were endorsed, and a motion was passed to engage the orchestra for that date.

The resignation of A. L. Smith, trustee accepted as he is moving away, elections for the office of Secretary-Treasurer were held, resulting in the election of Jas. Nesbitt.

The Board expressed by vote its thanks and appreciation for services of Mr. Smith, who has taken an active and conscientious part in the Board's activities.

Dated this 25th day of April, 1935.

## Dominion Botanist Makes Plea For Botanical Gardens To Study Wealth Of Plant Life In Canada

Canada's need for botanical gardens in which to assemble and to study her great wealth of plant resources as well as plant wealth from other parts of the globe, was discussed recently by Dr. H. T. Gussow, Dominion botanist, in lecture theatre B, University of Manitoba. This need was first voiced in February, 1886, by the late Dr. William Saunders, who said: "It has long been a reflection on Canadian taste and progress that we have not botanical gardens in this Dominion. In Australia and India are several such gardens, supported by the government. Botanical gardens have also long been established in Ceylon, the Mauritius, Jamaica and several others of the West India. Canada is indeed the only important British colony where such an institution is wanting." In 1935 it is still wanting, but urgently needed, it was shown by Dr. Gussow.

Briefly defined by Dr. Gussow, a botanical garden serves as a center for all branches of the study of plants, and fosters, insofar as possible, the practical application of the knowledge obtained by its workers, to economic, medical and industrial problems. It aims at making representation of as many families of plants as possible or of characteristic orders, species and biologically interesting species. It is a living museum, and a place for rest and recreation. It is a sports ground, a place of amusement park, though its beauty may delight the eyes and stimulate aesthetic and intellectual life, as does an art gallery or a museum.

The drawing power of botanical gardens is indicated by a reference to Kew botanical gardens—the world's most famous sample of a botanical garden, in a small island of 2,000,000 persons, many of whom are scientists and students from all parts of the world. Occupying 200 acres and equipped with a herbarium of two million specimens of plants and a library, Kew gardens serve all the world.

### Discovered In Transvaal

#### Fourth Largest Diamond In World May Go To U.S.

An unnamed American is understood to have offered \$500,000 for the famous Junker diamond, the world's fourth largest stone, weighing 176 carats. It is the size of a hen's egg. If the offer is accepted by the Diamond Corporation, the present owner, the stone, it is reported, will be cut into several smaller diamonds to form an arrangement of ear drops and necklaces.

The stone was discovered in January, 1934, by a native digging on a claim owned by J. van der Merwe, a Transvaal, Africa, J. van der Merwe, chairman of the Diamond Corporation, for a reported price of \$175,000.

Junker had been digging for eighteen years and was about to make his claim. The wife urged him on, and the next day his assistant, wading a bucket of water and gravel, cried, "I found it!"

After selling the diamond, Junker received a unique scheme to make good use of his wealth. He netted aside \$100,000 a year for his family and decided to buy land with the remainder to give poor whites a slice in life. He believes that within 30 years at least 100 white persons will be living independently on farms he is buying them.

Since its arrival in London, the diamond, which has a rare "extra-blue-white" purity, has been hidden in the Diamond Corporation's vaults at costs \$150,000 a year interest on the investment and insurance.

### Russian's Cheap Airplane

#### Is Only Suitable For Touring And Training Purposes

Russian experts, after long experimentation, announced the development of an aeroplane powered by an ordinary light automobile engine.

The engine is the type manufactured in great quantities by the Gorky motor factory.

The new plane is a two-seater which operates on ordinary auto gasoline. Inasmuch as it attains a speed of only 70 miles an hour its chief value seems from touring, is for training purposes.

Defective vision is the cause of accidents 20 per cent of the time, it is said, resulting in personal injury.

### Paintings May Be Valuable

#### Believed To Be Work Of Great Venetian Artist

A worn, discolored canvas which its owners believe is a famous "lost" Titian Madonna, and two other paintings supposedly by the great Venetian painter have been taken to New York for expert opinion.

The paintings are the property of Henry C. H. Stafford Springs, Conn., who is sure that they are not only genuine Titians but worth \$1,500,000, too.

The paintings were taken to Mrs. Robert H. Grimes, at a Park avenue hotel. Several experts who have seen them have pronounced them "very valuable" and expressed the opinion that at least the Madonna is a real Titian, Mrs. Grimes said.

The "lost" Titian Madonna has been the despair of connoisseurs for many years.

The most elaborate of the cited paintings shows a Madonna in a blue robe, seated, holding a child. A standing Christ Child while another celestial infant kisses the foot of the first one.

Another depicts St. Joseph holding the Infant Christ in his arms while the baby waves his staff. The third painting is of a guardian angel with arms thrust around a smaller angel and the other arm outstretched toward a boy of cherubim. The canvas of the Madonna has some large holes, but the smaller ones, while that of the guardian angel is almost ragged with age.

### Modelled After Mounties

#### Newfoundland May Soon Have New "Red Coat" Force

A force of rangers modeled after the Royal Canadian Mounted Police will be formed by the Newfoundland colonial government as well as approval is given by the Dominion office at London.

Consisting of 52 men at the start, the force will set up 18 posts on the island and five in Labrador, and for some time to come they will have to go through the pioneer work carried on in Canada by the Royal North-West Mounted Police before the larger Canadian force was organized.

A chief ranger, one inspector, seven sergeants, six corporals and 37 rangers will be assigned to the task of patrolling Newfoundland, outside the Avalon Peninsula, and the great little known hinterland.

Aeroplanes, automobiles, motor boats, horses and dog teams will be their "mounts" as they carry on their police work but "administrative" activities in connection with customs, relief and protection of forests and game.

### World's Most Accurate Clocks

#### Exhibits In Berlin Operated By Vibrations Of Quartz Crystals

Declared to be the four most accurate clocks in the world, novel timepieces are being exhibited by the Reich Institute for Physics in Berlin, where they were made. They are operated by the vibrations of a quartz crystal, and are said to deviate from the right time only 0.02 seconds in six months. The crystal is hung in a vacuum glass tube which is placed inside a box surrounded by a second box. The walls of both boxes are composed of copper tubes, air, aluminum and feathers, which keep the temperature within uniform limits. The vibrations are sent through the crystal which vibrates 60,000 times a second, and these vibrations influence an alternating current which keeps the clock going.

### Would Amend Criminal Code

#### Proposal To Prohibit Passing Off Dead Bodies As Living Persons

A proposal amendment to the criminal code which would prohibit the passing of a dead person as any female person was filed with the clerk of the House of Commons by T. L. Church (Cons., Toronto East), the Toronto Globe says.

"Sentence of death shall not be passed on any female person under the provisions of this act," the Globe says, the amendment reads. It also provides, says the Globe story, that "a trial by jury of a female person under any section of this act, one-third of the jurors chosen to try the issue shall be females, duly qualified on the same basis as male jurors."

## "THANKS FOR THE BUGGY RIDE"

Gary Cooper, film star, and his wife, the former Sandra Shaw, went for an old-fashioned buggy ride during their vacation at Bemuda, and the camera caught them in the act.

### Was Nemesis Of Spies

#### Detective Who Was Active During War Dies In London

Henry T. Fitch, 58, former Scotland Yard detective, whose duties as a personal bodyguard to the late King Edward at the turn of the century brought him the nickname, King's Shadow, died suddenly in London.

Fitch was active in tracking down spies during the Great War and also played a part in tracing the "master German spy," Bletchley, who operated in London shortly before the war.

In his book, "Traitors Within," Fitch recounted other anti-spye work on Great Britain's east coast during the war in the course of which several spies were captured and five of them later executed. The book also recounts how Fitch disguised himself as a waiter in a Sisko café, served Lenin and Trotsky, and obtained valuable documents by "accidentally" knocking a bundle of papers to the floor.

Only a small fraction of one per cent of all the millions of papers of war handled annually is lost.

The people who think the world is flat are about right just now.

### THE SNAPSHOT GUILD

#### THE CANDID CAMERA

It is the unusual, "candid" picture that attracts attention.

"Candid photography." What is it? Just this. It is one of the most fascinating branches of amateur photography and furthermore is fast becoming one of the things which wish to flourish.

For excitement, candid photography is a first cousin to big game hunting or deep-sea fishing but you need not go to the wilds of the north or nor of the coast of Florida to make your quarry. You will find plenty of material to shoot right in your own home town.

What, you may still say, "What, what is this candid photography?" Candid photography is nothing more nor less than taking pictures of people when they are unaware that they are being photographed. Get pictures of people catching them in natural, unposed positions with natural expressions. It might be called "intimate" photography—informal snapshots.

The essence of candid photography is action. Get pictures of people doing things. Such pictures should be taken as they occur, as subject as possible, for we are usually featuring people in this type of photography and they should be predominating in the picture.

When the subject of snapping people in "action" or "doing something" it does not necessarily mean that the person should be actually on a person's safety may make a great candid snapshot picture. He is doing something.

### Man Plans Best Kitchen

#### Model Was Given First Place Among 20,000 Entries

A man won the national \$5,000 competition organized by the British Commercial Gas Association against 20,000 women. The competition was the planning of a modern labor-saving kitchen, and the winner, Anthony Trew, a retired architect of Poole, a 75 years of age. The second prize, \$1,000, was divided between Miss Elliott Douglas, of Kelso, Roxburghshire, and Mrs. N. Collins, of Stoke-on-Trent.

Mr. Trew explains he made cardboard scale models of the ground plan of the kitchen and cut out cards to represent the space for the various fittings. From several plans he selected his prize-winning one.

Only 10,552,159 bushels of foreign wheat entered France in 1934. Of that amount Canada supplied 9,066,520 bushels.

The Madagascan aye-aye drinks by dipping its fingers into its mouth and putting them through its mouth.

Two hundred anglers in a contest at Deal, England, caught 976 fish in six hours.

## Stanley Baldwin Sees European Nations Taking The Dangerous Road That May Lead To War

### Putting It In Figures

#### Expert Helps Us To Realize Deleterious Effects Of Dust Storms

If the reader happens to have wondered why how much earth was moved in the recent dust storms in the Western States, of which reports have been appearing in gross dispatches, he might be interested in the estimate made by an expert of Kansas State College.

According to this expert, if a 90 mile line of 1 1/2 ton trucks could be put to work hauling 10 loads each per day, it would take them a year to haul back to Western Kansas the dirt that was blown over to the eastern section of the State. Altogether, he figures, there would be 46,000 trucks to be moved.

Putting the situation in this form helps one to realize the terrible destructiveness of a dust storm, but not necessary to have very much imagination to understand that a large quantity of good farm land must have been ruined provide all those tons of truckloads of dust—Quebec Chronicle-Tribune.

## GARDENING

### Gordon L. Smith

#### Early Stuff

With May almost here, it should be fairly safe to try a few rows of vegetables which are not usually sown until later. If frost does come along, there is a small loss, but with early sowing the risk is small, whereas if the stuff plants through there is the satisfaction of having from one's own garden vegetables, and usually early. Beans, potatoes, and a few of the other tender and semi-tender vegetables can be treated in this way. With heavy frost like such, rain and lettuce, one can make the first sowings just as soon as the ground is fit to work. Frost may hold them back but it will not hurt them. Handing out the seedlings to the garden in the name way, that is make a sowing or two after the usual time for planting so that there will be seed coming along weeks after the main crop has been picked.

#### Gardening With Rocks

A few years ago a step back at the end of the lawn was regarded as a distinct handicap. Grass, and ordinary flowers could not survive there. Nowadays, however, the only solution was large trees and in front of these a screen of shrubbery or vines to hide the raw earth. Now, nowadays, people want such banks to rock garden and often where there is no bank exists, one is raised by artificial and expensive means. This is not to be confused with the old style and rather unsightly rockery. In the new rock garden, boulders are set into the side of the hill, embedded so deep that frost will not seriously shake them, and also in such a way that the soil between will lead back into the main bank. Between the rocks a miniature rocky mountain range is created with gullies, alpine meadows and steep crags. Seed catalogues usually list alpine rock garden plants separately. It is important to secure seeds of plants suitable to "candid" conditions. It is also advisable to get special literature on the subject, or visit a neighboring rock garden, before attempting to establish a rock garden.

#### Use The Catalogue

A good seed catalogue is indispensable. Height of the flowers, times of blooming, whether they are suitable for such special purposes as edging, screening, cutting and fragrance are all mentioned and are vital factors in laying out a satisfactory garden. In the catalogue line the catalogue continues this useful service by listing different varieties under the heading of early, late and medium so that the succession of vegetables is possible right through the season. With unusual sorts, seed directions are given in regard to care and preparation for the table.

#### Cooking Under Water

An Englishman once undertook to cook a pudding at the bottom of the Thames. His friends declared it was impossible, but he proved them wrong by putting the pudding in a tin, then packing the tin into a sack full of rice, and lowering the sack into the river.

After three hours it was drawn up again, and it was found that the heat generated by the sinking of the line had cooked the pudding.

"The well-being of a people is like a tree; agriculture is its root, manufactures and commerce are its branches and life; if the root is injured, the leaves fall, the branches break away and the tree dies."—Shun-shun, Chinese Emperor and founder of agricultural implements, 2800 B.C.

European nations "are not walking the way of peace by those dangerous roads which may lead to war," Stanley Baldwin, lord president of the council, told the assembly of three Churches of England and Wales.

Envisaging what a satirist of the 21st century might write of this age, he said: "War left the constitutions of the great powers damaged and the convalescence was protracted and checked. There were frequent outbreaks of fever and temperatures rose above normal, sometimes to dangerous heights, and there were anxious moments when it looked as though the whole trouble would break out and infect all victims with the plague of 1914."

"Drugs and plasters were administered at Paris and Locarno. The patients were still alive but none could be said to be enjoying normal, robust health. No one was willing to risk the major operation of disarmament."

"One remedy proved worse than a disease and spread like wildfire—economic depression. Some even tried a drastic medicine called dictatorship and a walk through Europe was like walking through the warrens of a mental hospital. Each was filled with fear for the safety of its own particular brand of civilization."

In what was taken as a direct reference to Adolf Hitler, Baldwin said "we are not a people who will take with any pride or enthusiasm the wearing of gas masks. Whether we have to wear them or not we will regard them as a monstrous and tragic necessity, born of the horror of science to the service of barbarism."

He charged Germany regarding the League of Nations as "a pawn in the struggle for the national power and domination."

### Discover Heart Disease Drug

#### Chinese Doctor Hopes Isolate "Thevenin" As New Bloodant

From a poisonous nut, which has killed thousands of persons, medical science has isolated a new drug more powerful than digitalis in the treatment of heart disease.

This announcement was made at Toronto by Dr. Albert S. Hyman, director of the research of the Lilly Research Laboratories in Indianapolis, and Dr. K. K. Chen, director of pharmaceutical research of the Lilly Research Laboratories in Indianapolis.

The new drug is called thevenin by its discoverers. It is derived from the nut of the h-still or yellow oleaster tree, which grows in Hawaii and India.

Since last September it has been used experimentally with "remarkable success" at the Lilly Hospital under Dr. Hyman's direction.

Dr. Chen, a brilliant Chinese, famous for his application of science to ancient Chinese remedies, first began to investigate the properties of the best-nut three years ago because of the death of many persons who had eaten it.

He found that it contained a powerful poison, but this poison, properly used, stimulated heart action. It is claimed that thevenin is superior to digitalis because it can be injected into the body, whereas digitalis has to be taken through the mouth.

### Superstition In China

#### Labourers Reported To Have Made Human Sacrifices To Spirits

Superstitions which have persisted for centuries against South China farmers caused an alleged band to murder 16 railroad workers and kidnap 43 others. The crime followed fatal accidents to the workers, who made human sacrifices of local residents to appease the spirits who dwell underground, and to insure protection for their lives.

The fate of the 43 abducted workers is still unknown and fears have been expressed for their lives. Reports were current recently in the Kiating district, northwest of Honan, that railroad construction workers on the line between Canton and Hankow, near Choukouan, had killed several of the inhabitants in order to offer their blood as a sacrifice to the underground spirits.

The sacred African is the native of India, not Africa.

## HURRY ALONG THE CANADIAN ROUTE!

There have been too many delays in the completion of the Canadian route through the Kicking Horse pass to the Pacific coast.

It was thought that this route would be completed two years ago but the job is not nearly finished yet. There have been delays and excuses innumerable.

The auto tourists from Western Canada who want to drive to the coast are compelled to take routes through the United States, Idaho, Washington and Oregon have been profiting greatly as a consequence.

Spokane, capital of the Inland Empire, used to consider it a poor year when Canadian tourists spent only a million dollars there.

Venatche, Seattle, Portland, Tacoma, and other United States cities of the northwest, have built up an immensely profitable tourist trade from Western Canada.

These people would, for the most part, take the Canadian route through the Kicking Horse pass to the Pacific coast. The route is west to Golden, around the Big Bend to Revelstoke, and then along the rehabilitated Caribou Trail to Vancouver.

This route includes some of the most gorgeous mountain scenery in the American West. It is a route for innumerable tourists and will provide one of the most spectacular auto trips on the continent.

The All-Canadian Rocky Mountain auto road should be finished without any more delays.

## THE UNIVERSITY POLITICAL ISSUE

The bill to deprive the board of governors of Alberta University of any power to prevent members of the faculty from taking an active part in politics was defeated by the Alberta legislature.

The attitude was a proper one. The university is a provincial institution and should not be linked up in any way with politics of any kind.

Up to the present the University of Alberta has made good progress. It is now recognized as a leading seat of high learning in the west. The president is a man of outstanding ability and the personnel of the faculty includes some splendid educationalists.

The purpose of the institution is to provide skilled instructions in the higher branches of the arts and sciences. It would be a setback to the university was to become a hot-bed of political intrigue.

It is not an easy matter to launch a university and carry it along successfully through the years of immaturity. However, the provincial institution seems to have passed its callow years without a great deal of difficulty.

To permit the intrusion of anything that might cause dissension and halt progress would be inexcusable.

## CANADA'S MINERAL WEALTH

Most of the minerals produced in quantity in Canada and the United States come from the pre-Cambrian shield which runs across Canada and juts down into the United States in the vicinity of Minnesota and Michigan.

This geological formation is very old—in fact it is considered the "mother rock." Such old mountain ranges as the Laurentian in Quebec and the Alleghenies in the United States' Atlantic seaboard, spring from this pre-Cambrian.

The Shield crosses the northern portions of Quebec, Ontario, swings northerly in Manitoba, and thence westerly across Saskatchewan, Alberta and British Columbia.

The promontory that juts into the United States provides the great copper mines of Michigan and the vast iron mines of Duluth. The vast deposits of these metals there created the huge industries which founded the cities of Detroit, Cleveland, Chicago, St. Louis, Pittsburgh, Philadelphia, Buffalo, and Erie.

Canada, however, possesses the bulk of the accessible pre-Cambrian and already such wealthy mining districts as Rouyn, Kirkland Lake, Cobalt, Gowganda, have sprung from this rich rock. Great Bear Lake, Athabasca Lake, Gods Lake, Rice Lake and Little Long Lac are new gold fields, all located in the pre-Cambrian.

The Canadian government is going to spend some big money in aiding the development of mining in this vast pre-Cambrian area. Canada's mines have pulled the Dominion over the hump of the depression and may yet yank the country back to prosperity.

Canada is the world's largest producer of nickel, second in gold production, away up in lead, zinc and silver production and gaining ground rapidly in the production of copper.

It is difficult to be pessimistic about Canada when one examines the possibilities of the country's mineral wealth.

## THE ELEMENT OF CHANCE

Thelate Julius Rosenwald, head of the great Montgomery-Ward store system and notable businessman and financier, was once asked to give the only difficult personal attribute he ascribed his success. His answer was that he was fortunate; that many subordinates in his organization were better businessmen and executives than he; that luck was a big element in success.

Mr. Rosenwald was honest. Too many "big business" heads kid the public by flowery romances of their climb to success. Millions of men have given honest, conscientious and able service all their lives and never got beyond a mere competence. The fickle goddess Luck was not with them.

Winston Churchill, impulsive British statesman, illustrated the point we are making in a book he recently wrote. He said: "The longer one lives, the more one realizes that everything depends upon chance, and the harder it is to believe that this omnipotent factor in human affairs arises simply from the blind interplay of events. Chance, fortune, luck, destiny, fate, providence seem the only different ways of expressing the same thing, to wit, that a man's own contribution to his life story is continually dominated by an external superior power. If anyone will look back over the course of even ten years' experience, he will see what tiny incidents, utterly insignificant in themselves, have in fact governed the whole of his fortunes and career."

## School-Boy Boners

A boar is a person who is very tireless to listen to. Monsoon is the French word for Mister. An arifice is a ploy where a business man works. A mugwump is a bird that sits on the fence with its mug on one side and its wump on the other.

## HUSSAR

HUSSAR, April 22nd.—D. Swell came down from Calgary on Wednesday, returning on Friday.

The following teachers went to Calgary: Miss Margaret Sykes, Miss Brenda Leggat, Miss Ines Byrnes, Miss J. Freeman and Messrs. J. A. Collins and H. Roemer.

The Hussar First Company of Guides went to Calgary on Monday evening. The party consisted of Mr. J. Bell, Captain, and Miss Margaret Bell, Lieutenant. They represented Japan in the pageant of the Scouts, under the supervision of Scout Master W. J. C. Kirby and Assistant Scout Master, motored to Calgary in A. Anderson's truck. They represented Persia in the Pageant at the Jamboree.

The following parents also motored to Calgary on Monday for the Jamboree. Mr. and Mrs. J. C. Lawson, Mrs. W. G. Nelson, Mr. and Mrs. J. Dundas, Mr. and Mrs. R. H. Hosen, Mr. and Mrs. W. A. Treacy, Mr. and Mrs. E. J. Brown, Mr. and Mrs. E. A. Holland, Mrs. P. H. Reeves and also the Misses Peggy Reeves and Lois Nelson.

Mr. and Mrs. H. D. Brown were Calgary visitors on Thursday. Miss Lois Nelson returned with them. L. C. Tonnason motored to Calgary on Thursday and on Friday brought home his daughter who is attending school there.

Bill Jay and C. Erickson were returning to Calgary on Wednesday, returning the following day.

Mr. and Mrs. C. Jorgensen of Makepeace were Hussar visitors on Thursday. They report that they have been entertaining many different groups of people who have had cars stuck in the mud before their houses. The roads to Bassano are terrible.

Mrs. W. D. Moffat, Johnnie, Anne Margaret and Jerry motored to Bassano via Makepeace on Thursday after an unsuccessful attempt to attend the piano recital of Miss Margaret Bell's pupils on Wednesday evening. Mr. and Mrs. E. J. Bell, the Misses Peggy Reeves and Evelyn Holland and the Messrs. W.J.C. Kirby and H. C. Bell were also unsuccessful in an attempt to reach Bassano for the recital.

Miss Eleanor Moffat, who has been substitute teacher at the Alta Vista School for the latter part of the term, and Miss Margaret Bell, returned with the Moffats on Thursday.

The Medicine Hat Serenaders, who were marooned here after the storm on Saturday, returned to Bassano on Sunday by train on their way home. They are playing here on May 24. Ivan Anderson left for the flat on Sunday for a week with his brother Manville.

Shea Snyder left for Carmarvon on Wednesday.

C. T. Armstrong motored to Calgary on Thursday, and the Misses Margaret Bell and Eleanor Tonnason returned with him for their holiday.

Messrs. T. Lawson and T. H. Smith and O. Nissen returned from Calgary the first of the week. Owing to the condition of the roads, the Aid bridge party at the home of Mrs. Lawson was indefinitely postponed.

The W. I., which was to meet with Mrs. J. C. Hoeght, will meet with Mrs. R. E. Stelling, owing to the illness of Mrs. Hoeght. Miss Eleanor Heitman, who has been visiting her aunt for some time, is leaving, and Raymond Hoeght will be moving out to the farm.

Mrs. L. L. Woodford and Peggy will spend the holidays with Mr. Woodford on the farm.

F. Campbell is the proud owner of a new Ford V8.

Carl Stelling, who has been attending Tech in Calgary, and Mr. R. E. Stelling, arrived home on Thursday.

Miss Elsie Keddie and Jason Bell motored to High River on Thursday where Miss Keddie will spend her holiday.

Miss Nancy Elliott came home on Thursday, owing to the severe illness of her mother, Mrs. J. V. Elliott.

W. Sleskoo motored to Calgary on Thursday.

Art Flanagan and Emerson Brown left on Thursday for Hinton.

J. Dundas and Mr. and Mrs. McKinnon and children motored to Drumheller on Friday. Mrs. McKinnon and children remained to visit friends, while Mr. Dundas and Mr. McKinnon went to Crowfoot, where the latter entrained for Sask. He will motor back.

Miss Eleanor Moffat left on Saturday with A. Anderson for Calgary enroute for Warner, where she will visit friends.

Frank Montgomery went to Calgary on Monday.

## MAKEPEACE

MAKEPEACE, April 22nd.—The dances in the Makepeace School on April 15th was attended by a large crowd from Crowfoot, Hussar and Makepeace. Everybody had a good time to the music of Evelyn Jorgensen's Orchestra. Some of the crowd boys had a slight attack of romantic fever—perhaps the lovely moonlight night accounted for that; anyway we know spring is here now for sure. Thanks for your patronage and come again.

Mr. and Mrs. A. Sloane and the McCurdy family motored to Calgary from Crowfoot, Hussar and Makepeace. Steading has already started in that district.

We hear several reports of the muddy roads being hard on rear-enders. There have been several horse-back riders in the district lately. However, the roads are drying nicely and the dust is flying again.

J. Robertson and A. Bostwick are having an auction sale this week. We understand they are leaving the district, and extend to them our well wishes.

The softball teams are organized to and around Makepeace. We understand there will be a couple of games played on April 25th at the Makepeace School.

There is some talk of organizing a Young Married Men's Protective Association. Why? Some protection is needed when Crowfoot turns their backs.

There were two carloads of choice grain shipped from Makepeace to Rosebush this week. So you can look for a migration of settlers probably from that district.

It has been said by many wise philosophers that personal affairs should be kept out of public meetings, also mudsliding. Anyway, let's try to do it.

## EXCUSABLE "DUMBNESS"

It is always comforting, somehow, to see a professor shut his toes.

So there is something perversely pleasing about the knowledge that when 25 Princeton professors met at a two party the other day and decided to give themselves a general intelligence test, very few of them came even close to passing.

They asked themselves 41 questions. One man managed to answer 13 of them correctly. None of the rest did even that.

But before we crow too much over professional frailty, we might remember that those questions were really tough.

For instance: Did Naevius originate the fabula praetexta? Has the four-dimensional analog of a cube 12 corners?

Are the roots of a second polynomial of degree higher than four, complex numbers?

Let's not be too hard on the professors.

You could miss on a lot of questions like those and still be a pretty smart sort of person.—Vancouver Sun.

The Hussar Sunday School commemorated Easter Sunday with a program on Sunday afternoon with J. Bell, superintendent, as chairman. The selection of hymns, songs, readings and recitations were very fitting for the occasion.

The Hussar Sunday School commemorated Easter Sunday with a program on Sunday afternoon with J. Bell, superintendent, as chairman. The selection of hymns, songs, readings and recitations were very fitting for the occasion.

## OLD JAKE SPEAKS TO THE GANG AT THE P. O.

by Tim Longbotham

In the daily publications you will find, beside the news, Quite a lot of strange epistles setting for some startling views.

These are fine for entertainment—so are all the comics too. But beware of certain features or like me you'll live to rue.

Often in my idle moments advertisements I would read 'Tells' of the dreadful ailments that afflict the human breed.

Anxiously I traced the symptoms (cured for fifty cents or less), And was certain of my demise, for I had 'em all, I guess.

When I reached the age of fifty, I was sure an awful wreck, What with danged peculiar feelin's waltzin' down my head

An' I bought the weary willies, so I couldn't move a foot, While all the bloomin' Hootchie-Kootchie's robbed me of my sleep to boot.

Then I thought that I was loosed for the jitters hit me spine, So I ordered Dempsy's tonic (yes, 'twas good old stinkweed wine).

An' I bought me salves an' lotions for a fearful creaky knee; Til one happy summer mornin' came a miracle to me.

Then the missus called the doctor, for she thought I sure would die. But that gentleman did comfort her an' bade her not to cry.

An' with kind an' cheerful manner told me of a certain dose, That would cure my nerves an' muscles, an' revive my fadin' hopes.

"Aqua Pura," he did call it an' 'twas jolly nice, I'll say, So I lapped it up in tubfuls in the most obedient way; Til I learned 'twas only water, then got mad as any Turk, An' went out an' grabbed a shovel an' proceeded with my work.

## Bright Stories about Wine

HOPE FROM THE BALKANS

● We said in our last piece that wine-making might be a larger industry than it is in Canada if early vineyardists had realized from the beginning that the grape native to North America, the *vitis labrusca*, had its own special merits; and had not persisted in their thousand and one experiments with *vitis vinifera*, which was famous but conspicuous to say the least for its constant failure. It is worth noting, though it may be more interesting to the vineyardists than to the general public, that in Ontario we have been conducting some further experiments with the vine of Europe which give promise of greater success than ever before. We have been testing a variety of *vinifera* which grows well in Bulgaria in the hope, if not indeed the expectation, that it will prove more suitable to our climate on the Niagara Peninsula than any of its numerous brethren which have had all merits but the important one of being able to live.

● Stranger things have happened than that the traditional European grape should prosper on our soil. There is knowledge reaped by experience now at the disposal of the horticultural experts which was not available a hundred years ago or even ten years ago. What has happened to the wheat in the West may well happen to the grape in the East. The hybridists are at work and are prepared to swear that sooner or later they will produce a grape which will have all the disease-resisting qualities of the native grape and the special qualities so much admired in the European grape. There is no reason why it shouldn't be so. There is the man in Russia who is called the Russian Burbank. His name is L. V. Michurin. He has developed grapes to flourish in Siberia. And if in Siberia, why not in the Peace River district? And where grapes grow, sound wine can be made.

DONATE TO THE  
CANCER FUND

From the far northern point of Fort Fitzgerald to the southern border of the Province, envelopes for the Silver Jubilee Cancer Fund have been sent from the head-office of the campaign in Calgary, to 84 Boy Scout Troops in different towns in Alberta. Before Saturday 11th, 25,550, boxes were reached. Contact has also been made through the rural schools of the province.

Readers of "The Mail" are asked to enclose their contribution, no matter how small, seal the envelope which is addressed to Lady Benson, Ottawa, and Mail. No stamps are required.

Alex. — "Looks like rain."

D'Arcy — "Yes, and tastes like sheep-dip."

## "TOMORROW"

Man's gloom, however, deep to-day,  
Is sought but ignorance  
Of unkind joys that lie ahead  
Tomorrow.

When, honest, tall, shall reap its  
Just reward,  
And man no more shall have to  
heg or force

That he might live,  
The force, which battles him today  
With its strange eagerness  
To serve, shall truly set him free  
Tomorrow.

Releasing man from petty earthly  
cares  
"Twill bid his mind go spread its  
wings and soar  
To heights, unknown!  
The laws by which we live to-day  
Are fit for savages.  
When every man must grey upon  
His forehead!

And as one's long days mean an  
other's gain,  
Then, forth alone show mercy, all  
is won  
By selfishness!

Alas, that we should scorn to heed  
A man's earnest logic call  
Till chance be thrust, without  
consent,  
Upon us!

For thus the world must wait in  
dark despair  
Whilst Nature doth convince us  
of one by one  
Through suffering.

But stay! Thy future joys are now  
so inconceivable,  
No words can do them justice till  
Tomorrow;  
When man's reward shall rest upon  
how well  
He serves the common purpose,  
which shall be  
Man's happiness!

—Percy H. Hill,  
Casalta, Alta.

## COUNTRESS

COUNTRESS, April 23.—Mrs. Hay-  
went to Calgary to see her husband  
who is very ill.

Mrs. Menzies and Miss Newman  
were visitors at the Club meeting  
at Mrs. Snape's last week. The next  
meeting will be with Mrs. H. D. Ben-  
jamin on the last Wednesday in  
April.

Mrs. and Mrs. Stevenson and Ellen  
left on Thursday of last week after  
spending two weeks here disposing  
of their stock, etc.

Bernice Thompson is spending a  
week in Calgary.  
There will be Sunday School at  
the School house at 11 a.m. Every  
one welcome.

Miss McRoberts is spending the  
holidays with her parents in Calgary.  
Mrs. B. D. Benjamin and Lila-Lou  
spent a few days in Brooks last  
week.

Mr. Newman is moving to Glen-  
hurst, where he will occupy the Douglas  
house.

Mr. Geo. McIntosh came home  
from Calgary on Saturday night,  
where she has been for some time.  
Marie Robert, Paul Chamberlain,  
Mrs. Stone and Carl Sykes were din-  
ner guests at the Gamble home on  
Sunday.

Rich men have their country places  
but poor men must be satisfied with  
farms.

Money may not buy happiness but  
with it you can be unhappy in com-  
fort.

Some people have no respect for  
age—unless it's bottled.

Plattery is soft soap and soft soap  
is 90 per cent lye.

There's a big difference between  
death and taxes. Death doesn't get  
worse every time the Legislature  
meets.

The real reason a Scotch bagpiper  
walks up and down when playing is  
because it is always harder to hit a  
moving target.

More than half of the fresh water  
area of the world lies within the  
boundaries of Canada. That's why  
Canadians so seldom get drunk. They  
use that cheap commodity to dilute  
their liquor.

## Items from the Past

Extracts from Old  
Files of The Mail

## 18 YEARS AGO

THURSDAY, April 25, 1917.—Pro-  
vincial Auditor, James and Edgewood  
were here this week looking over  
Deputy Sheriff Macgregor's books to  
see how neatly they were kept.

The announcement of the appoint-  
ment of H. W. Ford as official audi-  
tor is contained in the last issue of  
The Alberta Gazette.

Mr. and Mrs. Matthew Boiten and  
the three little boys have arrived  
here from Beverly, Massachusetts,  
and are settling out in Glen Colony.

Mrs. Dr. Scott, who has been  
spending the winter in Palmerton,  
Ont. and Brandon, Man., arrived  
home again on Saturday.

Breg H. Bunay, the famous Dor-  
othy rancher, is being around now  
with a bright new Dodge car hav-  
ing disposed of his Ford to John  
Gelling of the Springfield-Alberta  
farm.

Farmer John Clyne rode through  
town on Tuesday with a brand new  
Twin engine, and manipulated the  
machinery after passing up all his  
acquaintances and hoboes.

F. D. McNaughton of the C. P. I.  
department at Brooks has been in  
town this past few days looking for  
a diver to work at the dam. One was  
secured near Lomond.

Quite a large acreage has been put  
in the past week, although as yet  
nothing is somewhat backward, it is  
said, however, that the land was  
never in better condition for spring  
work. Cool weather has had consid-  
erable to do with the delay in work.  
So far there appears no scarcity of  
farm labor, and a large number of  
steam and machine tractors have  
been purchased this year.

After seven years in town, J. T.  
Allen, proprietor of the Exchange  
Livery Barn, has sold out and this  
week is moving away to Washington,  
and later will go on to Arizona. His  
interests in town were disposed of  
to M. R. Mitro.

After remaining a while in Wash-  
ington, Mr. Allen will go into the  
cattle business in Arizona where he  
owns considerable land.

The exclusive 400 has been aug-  
mented this week by one lady barber  
who will take quarters in Charlie  
Cole's pool room. Those who love to  
have the soft hand of a lady smooth  
out and soft soap their wrinkled  
brows are hereby challenged to do  
or dare.

Girl at college: "I'll stand on my  
head or bust!"  
Gym instructor: "Never mind Miss  
Miffler, just stand on your head."

## THE PARLIAMENTARY SHOW

(Continued from Page 1.)

before a judge in chambers. Nothing  
but a mere settling of a lawsuit is to  
be allowed. Coming at the close of  
the session it led to vigorous pro-  
tests from opposition members, back-  
ed by the daily papers, the weekly  
newspaper, association and several  
hundred newswriters, all of whom  
will be affected by the bills.

After two days of protests, the  
Attorney General, Mr. McPherson, has  
agreed to modify the bill so as to per-  
mit reports of the final judgments  
in the to set aside on grounds of  
alleged fraud, the divorce obtained  
by the former Hon. O. L. McPherson,  
and the appeal in the damage action  
for seduction of a government ses-  
sioner brought against the former  
Premier J. E. Brownlee.

So heated were the feelings that  
in a discussion over an affidavit made  
by one of the newspaper witnesses  
the former Hon. O. L. McPherson  
assaulted Chas. E. Campbell, pub-  
lisher of The Edmonton Bulletin,  
outside the Legislative chamber. The  
blow which took Mr. Campbell, his  
awareness was not serious but the pub-  
lisher was knocked out by his head  
striking the marble stairway.

Mr. McPherson made a verbal at-  
tack on Mayor Joe E. Clarke of Ed-  
monton in the House, when Mayor  
Clarke called out from the public  
gallery to the ex-minister "You're a  
liar and you know it" he was re-  
quested to leave. The Speaker later gave  
orders that the Edmonton mayor be  
silenced in the Chamber again  
during the present legislative ses-  
sion. The press fight was still raging  
when the Good Friday adjournment  
was reached.

Second issue in the question of the  
bill brought in by Fred White, Labor  
leader, to allow university professors  
to run for the Legislature or for Par-  
liament without risk of dismissal. In  
the course of the debate, it was dis-  
cussed that Premier Reid and ex-  
Premier Brownlee had gone to the  
University Senate with a proposal  
that the ban against running for office  
be suspended for one year, to  
permit Prof. W. H. Alexander to run  
in Edmonton, and thereafter be in-  
voked against all others.

This led to heated accusations that  
the premier and ex-premier are using  
the university for political purposes.  
The fight was not over when the  
Legislature adjourned for Good Fri-  
day.

Third issue in the question of  
Social Credit. When the question of  
approving the action of the Field  
Government in inviting Major C. H.  
Douglas to come to Alberta at a cost  
to the taxpayers of \$13,000.00 came  
before the House, W. R. Howson,  
Liberal leader, in approving the in-  
vitation charged the government with  
bad faith. "Here you are inviting  
Major Douglas to come here," he  
said, "on the excuse that you want  
to know more about Social Credit be-  
fore deciding what action to take on  
it, while all the time you are mak-  
ing speeches in the House, or the  
daily before public gatherings de-  
nouncing Social Credit as a menace."

Mr. Howson charged that the gov-  
ernment is taking \$13,000.00 of the  
public's money, not to get informa-  
tion about Social Credit, but to try  
and confuse the public during elec-  
tion time. He said it was no wonder  
that Wm. Aberhart had refused the  
government's invitation to come to  
Edmonton and tell them about Social  
Credit, while members of the gov-  
ernment are denouncing and ridicul-  
ing Social Credit in the bitterest  
terms.

According to rumors round the  
House, an estimate has been arrived  
at between the government, the Con-  
servatives and the Labor group to  
form a union government to try to  
make Social Credit the issue in the  
coming campaign. The Labor group  
has all along acted the part of a tail  
to the government dog, while D. M.  
Duggan, leader of the Conservative  
party and H. C. Partridge, his chief  
lieutenant, have both given radio ad-  
dresses severely opposing Social Credit  
since its introduction.

Just before adjournment on Thurs-  
day, Hugh J. Montgomery, Liberal  
member for Wainwright brought in a  
resolution advocating that the gov-  
ernment do as other provincial gov-  
ernments have done — sell all the  
indebtedness purchased for the use of  
the ministers. He said there are be-  
ing used for private purposes and for  
political trips.

It is expected that a bitter discus-  
sion will result.

## CROWFOOT

CROWFOOT, April 23.—Seeding  
is rather late this spring, but with a  
couple days of warm, dry weather,  
seeding will be general.

Mr. and Mrs. Wm. Mullin and fam-  
ily of Calgary spent the Easter holi-  
days visiting Mr. and Mrs. Chas.  
Rothbauer.

We are happy to report that Joe  
Roberts is home again and feeling  
fine after being quite ill in the Bas-  
sano Hospital for several days last  
week.

Mr. and Mrs. Alf. Sloan spent the  
week-end visiting Mr. and Mrs.  
Sloan Dr. of Calgary.

The local boys are talking soft-  
ball again. There will be a double at  
Milespiece on Sunday afternoon  
when Latham is coming up to take  
on Makepeace and Crowfoot playing  
the winner. Come out and root next  
Sunday!

Mr. and Mrs. Elsie Robertson  
spent the week-end at the Wilton  
home near Gleichen.

Miss Irene Brookes is spending  
the Easter holidays in Calgary.

The Misses Helen and Edith Plan-  
nigan of Hutton and Boneta John-  
ston of Bassano spent the holidays  
visiting the Roberts girls.

Mr. and Mrs. John Penning, Wm.  
F. Rothbauer spent last Wednesday  
in Calgary.

Mr. and Mrs. E. W. Campbell and  
Vera, and Arthur Rothbauer were  
dinner guests of Mr. and Mrs. P.  
Holtan on Easter Sunday.

She: "Every time I come to Flori-  
da I have to discard my heavy  
undies. You know, I'm from Mas-  
sachusetts."

He: "Is that so, I'm from Mas-  
sachusetts."

She: "Sir!"

## WORLD HAPPENINGS BRIEFLY TOLD

Nelson R. Butcher, who picked up his shorthand while working on a farm and later became recognized as one of Canada's best reporters, died recently in Toronto.

Preparations for the King's Jubilee celebration resulted in the biggest monthly drop in British unemployment in three years, the ministry of labor announced.

Sixty members of the Canadian Legion headed by Hon. Philippe Roy, Canadian minister to France, made a pilgrimage to Vimy Ridge. Representatives of the British Legion accompanied them.

Paving the way for heavier levies on higher incomes in Alberta, the government introduced a resolution in the legislative assembly to provide for a bill to amend the income tax act.

Children 12 years of age and over will be tried for crimes and be liable for the full penalties of the law, excluding capital punishment, the same as adults, the Soviet government announced.

Some of the 400-year-old records of the central Paris courthouse were destroyed by a fire which raged more than an hour in ancient St. Louis tower before firemen brought it under control.

Total amount of outstanding Dominion tax free bonds aggregates \$326,960,900, Secretary of State C. H. Cahan stated in an answer tabled in the House of Commons.

Paul Ito (Ishibashi, Tamaoka) raised the question.

Another England-Australia air derby with generous prizes may be held next December in honor of the centenary of South Australia. Premier R. L. Butler of South Australia said in a speech at London. The race would finish at Adelaide, capital of South Australia, he said.

## Man Has Strange Fear

Remains in House 30 Years To Avoid Having Pneumonia

In Sheffield, England, lives a man who, for the past 30 years, has never gone outside his own house. He is imprisoned because he has a fear of pneumonia. He feels that if he goes into the open air he will catch a cold and that will develop fatally. Although he never leaves the house, the man John Scates is in good health, and operates his business from his residence. Contact with other than members of his family and those connected with his business is another thing he forbids. His dread of the supposed dangers of the open air is not held by him alone, although in these days such a dread is rather hard to understand. The medical officer of health for a southern shire, whose duties take him into the houses of the richest and the poorest, tells of cases of cottagers who never open their windows and who, after he has smashed them (the windows, not the cottagers) in an effort to get the house thoroughly aired, immediately close the openings with thick paper. Medical advice to the contrary, they have a horror of open air. And, remember, our ancestors, with their canopied beds which kept out the faintest suspicion of a "draught."

## Sportmen, "Swat That Crow"

Interest in Crow Destruction Week Growing Through The West

Canada's National Crow Destruction Week, commencing April 22nd, is getting well under way. This movement, in the interest of conservation of wild bird life, initiated by the Saskatchewan Fish and Game League, is spreading from coast to coast. Since the preliminary announcement two weeks ago, the Alberta Fish and Game League has circulated all its members urging cooperation. The Manitoba League is falling in line. Publications of national circulation, are urging sportsmen to accept the challenge thrown out to them to fight for the heritage of a plentiful supply of game bird and song bird life in this country. This battle with crows is not limited to the sportsmen alone as chief participants. Farmers and ranchers are vitally interested. Those who prefer to hunt with the camera instead of the gun will do their part to rid the country of this most pestilential marauder of the spring crop of other birds nests and of the black hearted plucker of the young birds that succeed in hatching.

But calling the crow what he should be called and finding him guilty of his crimes, will not suffice. It is execution on the scaffold in the literal sense of the phrase, that is necessary for the success of this campaign. The duck is on the way back, over their centuries-old flyways, the prairie breeding grounds, in greatly diminished numbers. Soon, the sharp-tailed grouse, equally as defenceless as the duck, against the attack of the crow on the nest or the young, will be dying of old age, full of years. From sixty to eighty per cent of the early nests of those birds will be destroyed on the prairie area, where cover is scarce by reason of the last four years' drought. Call the crow a pest, a pest, during the dry summer and fall of 1934, and you will understand to what extent, that nests will be as visible to the soaring crow as an airport to a pilot. One quarter of a million crows, each destroying one nest, will deprive one million game birds and song birds of the right to live.

Branches of Game Leagues everywhere are urged to get down to business in active organization, to reduce the crow population by at least one million during the spring and summer of 1935. There is not much use in waiting on governments to do the job. The sportsmen ultimately is the best friend of the game bird and the best enemy of the crow.

For centuries the crow has been regarded with a mixture of respect and hatred. It is a harbinger of war, plague or death. They are said to be the devil's own birds and bear his mark in the shape of a globe of what looks like scarlet sealing wax at the end of the shaft of some of the wing feathers. In recent times the old belief has been strengthened by their being seen during the winter preceding the World War and the Franco-Prussian war.

Then what about getting rid of a million crows before they have a chance to lay their eggs. Make the bounty five cents per pair of crows shot. The weapon, that has been used for centuries, the slingshot, can be taken out again, and put to the most useful purpose for which it was ever employed, by sending well directed charges of shot, at the crows in the sky. The weather is still too cold, to enjoy the hour in the sky field or at the traps, competitions of this nature will only render real service, but will bring back that fine old feeling of exhilaration, which comes only from a tramp in the out of doors with a gun in a crook of the arm, a crow call between the lips and the old hand pointing out some of the slugs, that it has gathered up in the winter's inactivity.

Sportmen, swat that crow, in the Crow Destruction Week and for the rest of the summer as well.

Campaigns of this nature need assistance which can be given by active membership in Fish and Game Leagues organized in every locality.

The weight of a loaf of bread in Canada is not standardized but it is regulated by municipal by-laws in the various provinces with the exception of Ontario. In Ontario the legal standard weight of a loaf is fixed at 24 and 48 ounces, except that in the various provinces with the exception of Ontario, the limit is fixed at 12 ounces.

Direct canal communication is to be made between Bremen and Hamburg, Germany.

—Cunard White Star Photo.

The decision of Cunard White Star marine designers to retain the knife-edge bow in the new super-liner "Queen Mary", as against the so-called bulbous bow, has started quite a controversy in shipping circles. All of the large liners built within the last few years feature the bulbous bow. However, it was the knife-edge bow which enabled the Mauretania to keep her average speed-queen of the Atlantic for 22 years after her launching. The "Queen Mary" is expected to enter the trans-Atlantic service in early winter of 1936.

## Birds Cause War Worry

Europe Dilemma Was Wings

Because birds known as waxwings have been seen recently in northern countries of Europe, superstitious people are predicting a European war or some other great calamity. For centuries the arrival of waxwings in winter has been regarded with a mixture of respect and hatred. It is a harbinger of war, plague or death. They are said to be the devil's own birds and bear his mark in the shape of a globe of what looks like scarlet sealing wax at the end of the shaft of some of the wing feathers. In recent times the old belief has been strengthened by their being seen during the winter preceding the World War and the Franco-Prussian war.

Hunters can tell almost the exact height of an elephant by the size of its track. The shoulder height is double the circumference of the fore-foot.

The largest beetle in the world is the African giant beetle which has a body four inches long.

People of Rumania are again advised to their bank savings accounts.

\$2,000 GOLD CUP FOR INTERNATIONAL GOLF TOURNAMENT AT FORTNELL, ONTARIO, JULY 11-12-13

Never in the history of Canadian golf has so handsome or valuable a trophy been donated for competition as the Sengram Gold Cup, presented by Sengrams for the annual competition in the General Brock Hotel Open Golf Tournament to be played at the Lookout Point Golf Club, Fortnell, Ontario, on July 11, 12 and 13. The cup stands eighteen inches high, is mounted on an ebony base and is a very fine example of the goldsmith's craftsmanship of several hundred years ago. Mounted on a metal and enamel stand with eighteen carat gold, it could not be duplicated to-day for less than two thousand dollars. Through Christy Gold of London, England, this trophy was secured from the estate of Lord Darnley.

The presentation of this heirloom

## A Huge Investment

Livestock Industry Is Very Valuable To Canada

The Dominion bureau of statistics reports the value of farm livestock in Canada for 1934 at \$413,837,000 compared with \$403,135,000 in 1933, estimated the average value per acre of Canadian farm land and buildings at \$23 compared with \$24 in 1933 and the combined monthly value of wages and board for the 1934 summer season at \$33 for men and \$22 for women.

It said the wage and board rate for men was \$1 a month more than in 1933 and the same in both years for women.

Gold to a value of approximately \$100,000,000 has been taken from the sands and creek beds of the Nome, Alaska, region since gold was discovered there in 1898.

In England last year there were 20,000,000 more weeks of work than in 1933.

Two thousand carloads of potatoes are eaten in the United States daily.

Japan's most famous archer was Tametomo.

Lord Darnley was murdered at instigation. It is believed, of Mary and the Earl of Bothwell, for in the middle of the hunting season, when Darnley and his followers were celebrating at his hunting lodge, it was blown up.

The Cup's magnificent workmanship makes it a most attractive trophy and the winning team returning the lowest combined aggregate score for the seventy-two holes of modern play will keep it for one year. In addition, each member of the team will receive \$50.

Entries are contemplated from teams representing Canada, Japan, the United States, Great Britain, Argentina, and foreign-born United States professionals and amateur teams from both the United States and Canada.

## Noted British Inventor

J. L. Baird Is Claimed With Edison And Marconi

The adoption of J. L. Baird's television invention by the British government, experts in the cinema of romance every bit as remarkable as that of Edison and Marconi, says the News of the World. "Mr. Baird is a son of the masses. He was born at Helensburgh 46 years ago, and was so precocious that by the time he was 14 he had fitted the house with electric light and telephone system. When the war interrupted his studies he sold socks and a boot polish of his own invention, made jam in Trinidad, and when he was driven back to London by ill-health became a dealer in horse, fibre and soap. He has been working on his invention since 1924, at first in Hastings, then in two rooms in Boko, and latterly in one of the towers of the Crystal Palace. In appearance he is a big, absent-minded looking man with a mop of long fair hair, steel spectacles, and untidy clothes. He married in 1931 Miss Margaret Albu, a pianist well known to B.B.C. listeners.

## Has Education Campaign

Idea In Afghanistan Develops Into Race With India

Afghanistan is progressing with the campaign started by King Amanullah to make his people like Europeans, even though he lost his crown in the attempt. One phase is the advancement of education and this has developed into a race with India. Five miles outside Kabul a new university is being established and will be called Darelman, or City of the Mine. Already professors from France and Germany are holding classes in Kabul. Afghan students have been sent to Europe for education. On the other side of the border Peshawar is to have its own university along the same lines as other universities in India. This will mean a new standard of education for the Pathan people, many of whom have relations in Afghanistan, and there will be a continual race for advancement.

Cowhides to the value of \$277,547, sheepskins, \$154,441; calfskins, \$137,441, and "barren leathers," \$322,940 were used during 1933 by the Canadian miscellaneous leather goods industry, which includes harness, and dairy, trunk, bags, purses, and belts. Other farm products in the shape of goatskins and pigskins were also used in smaller quantities.

The Romans lack in the first century A.D. had the custom of putting statues of famous authors in their libraries.

Ocoas, introduced into Africa from Central America, is the main agricultural feature of the Gold Coast.

How deep in the sea whales cavade is not yet discovered by science.

Eighty-Year-Old Man Has Had Colder Career

John Hays Hammond dug mines for precious metal under the surface of four continents, and got himself mixed up with a Mexican revolution and one in South Africa while doing it. Sunday, March 31, was his eightieth birthday and he has said that he might buy himself an airplane to celebrate. A veteran of many express days in the Wild West, this eminent engineer recently has made considerable use of airplanes and blimps, "now that I can afford to take chances I couldn't as a younger man."

Exports from Argentina are greater than a year ago.

## FALSE TEETH

**DR. WERNETS POWDER HOLDS FAST**

When this dental powder is applied to the teeth, it holds fast the teeth in place, and keeps them from falling out. It is the best powder for the teeth, and it is the only powder that holds fast the teeth in place, and keeps them from falling out.

## Rare Operation

Corner of Eye Of An Infant Transplanted To Eye Of Adult Patient

A comparatively rare surgical operation was reported by the Columbia Presbyterian medical center, in which the corner of the eye of a stillborn baby was transplanted in the eye of Fremont Clark of Wadena, Minn.

The success of the operation, performed by Dr. Ramon Castroviejo, cannot be determined for several days. The operation was described as "unusual when effective." The patient's eyelid is sewn shut and the eye heavily bandaged so that the tissues may be undisturbed in taking root.

## Recipes For This Week

(By Betty Barclay)

## BRAN BANANA MUFFINS

2 tablespoons shortening  
¼ cup sugar  
1 egg (well beaten)  
1 cup sour milk  
1 cup all-bran  
1 cup flour  
¼ teaspoon soda  
¼ teaspoon salt  
1 teaspoon baking powder  
½ cup chopped banana.

Cream shortening and sugar; add egg, milk and bran and let stand while measuring remainder of ingredients. Stir four with soda, salt and baking powder. Cut banana in small pieces and add to stiff mixture. Add to first mixture and stir until four disappears. Bake in greased muffin tin in a moderate oven (400 degrees F.) for 20-25 minutes.

Yield: 16 small or 8 large muffins.

## BAKELESS PUDDING

1½ cups (1 can) sweetened condensed milk  
Juice of 3 lemons  
1 cup Graham cracker crumbs  
2 eggs

Blend together sweetened condensed milk, lemon juice and well-beaten egg. Stir until thick. Add graham cracker crumbs. Place in sherbet glasses. May be garnished with whipped cream and nut meats. Serves six.

Mrs. E. R. Copeland and Gerald returned Tuesday from spending holidays with friends in Calgary and spent two days visiting with Mr. and Mrs. L. Bauman and family.

Wm. Wilson is moving to Duchesne this week.

WE LIKE TO GET ALL THE LOCAL NEWS POSSIBLE

The main aim of the weekly newspaper, as the name implies, is to give news of its own district. It must give other aims, such as to give the business men a chance to tell of their work in its columns, or to try to influence public opinion through its editorials; but first of all it must give the news. Some of this news is not easily obtained and no editor can cover it all without assistance. Especially is this true when you have visitors. Many of the ladies think that persons are the most interesting reading in the whole paper. Your visitors are usually glad to have their names appear, so send them in. Some times people come in and give the impression that they are asking a favor when they want us to insert the names of their friends who have been spending a few days with them. No person need feel that way about giving us news items, for we are glad to get them all.—Gleichen Call.

**TENDERS**

TENDERS FOR COAL

Sealed tenders addressed to the undersigned and endorsed "Tender for Coal" will be received until 12 o'clock noon (daylight saving), Tuesday, May 14, 1935, for the supply of coal for the Dominion Building and Experimental Farms and Stations, throughout the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from the Purchasing Agent, Department of Public Works, Ottawa; the District Resident Architect, Winnipeg, Man.; the District Resident Architect, Regina, Sask.; the District Resident Architect, Calgary, Alta.; and the District Resident Architect, Victoria, B. C.

Tenders will not be considered unless made on the forms supplied by the Department and in accordance with departmental specifications and conditions.

The right to demand from the successful tenderer a deposit, not exceeding 10 per cent of the amount of the tender, to secure the proper fulfillment of the contract, is reserved.

By order, N. DESJARDINS, Secretary.

Department of Public Works, Ottawa, April 15, 1935.
